DETAILED ACTION

Claims 4, 7, 13, 14, 16, 20, 21, 26, 27 and 30 have been amended. Claims 31, 32, 33 and 34 are newly added claims.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, 16, 22 and 30, drawn to DNA encoding a receptor protein that specifically recognizes bacterial DNA having an unmethylated CpG sequence and a host cell expressing the DNA.

Group II, claim(s) 8-13 and 28, drawn to a receptor protein that specifically recognizes bacterial DNA having an unmethylated CpG sequence and a host cell expressing said protein.

Group III, claim(s) 14-15, drawn to drawn to an antibody.

Art Unit: 1648

Group IV, claim(s) 17-20 and 31, drawn to non-human animals with a gene encoding a receptor protein that specifically recognizes bacterial DNA having an unmethylated CpG sequence.

Group V, claim(s) 21, drawn to a method of restoring expression of a protein having reactivity with bacterial DNA.

Group VI, claim(s) 23, drawn to an *in vitro* method of screening for an agonist or antagonist.

Group VII, claim(s) 24-26 and 32, drawn to an *in vivo* method of screening for an agonist or antagonist.

Group VIII, claim(s) 27, 29 and 33-34, drawn to an agonist or antagonist.

The inventions listed as Groups I-X do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The claims are directed to a DNA encoding a receptor protein that specifically recognizes bacterial DNA having an unmethylated CpG sequence, which is the first product. However, because Hemmi et. al. (cited in the IDS) is drawn to a receptor

Art Unit: 1648

protein (TLR9) encoded by immune cells that recognizes bacterial DNA containing unmethylated CpG dinucleotides, no special technical feature exists for Groups I-X as defined by PCT Rule 13.2, because it does not define a contribution over the prior art. Note that PCT Rule 13 does not provide for multiple products or methods within a single application. Because the technical feature of Group I is not a special technical feature, unity of invention is lacking.

Joint Inventors

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
